Course Description

This course will introduce students to the importance of Educational Philosophy both at the level of the overall society and the individual teacher. There will be a strong theoretical background to underpin and enrich student thinking about the major issues in Education such as the role of Education in the development of societies and individuals. Students will explore, develop an understanding of ethics and professionalism while exploring the roles of the teacher.

Instructional Processes

Collaborative tasks, case studies, simulations, interactive lectures, interactive presentations, class discussions, movie analysis, research.

Class Policy Goals and Expectations

It is important that student teachers develop an appreciation for the various philosophical perspectives which impinge the life of the teacher and the students in the education system in Jamaica and the Caribbean. It is also critical that student teachers develop a deep appreciation of the cultural, economic, historical and political perspectives that impact the development of the education system in Jamaica and the Caribbean. It is also imperative for student teachers to develop an appreciation of philosophy in general and a personal philosophy of education. Consequently lecturers and student teachers exploring this course should collaborate respectfully and professionally in order to enact teaching as a reflective, interactive process of learning. Student teachers and lecturers are expected to demonstrate a passion for learning through the administration of effective and efficient critical thinking, time management, communication and technological skills. Adherence to the guidelines of the Teachers' Colleges of Jamaica (TCJ) is mandatory.

Summary of Content

Unit 1: What is Philosophy?

Specific Objectives

Student should be able to:

1. Understand the importance of philosophy to Western civilization of which Jamaica is part.
2. Critically assess the ideas of selected philosophers.

Unit 2: Education, Knowledge and the Curriculum

Specific Objectives

Student should be able to:

1. Understand some of the major concepts relating to education, knowledge and curriculum.
2. Assess the benefits of education to the individual and society.
3. Understand the dynamics between educational philosophy, society at large, class interests and what is included in the curriculum.
4. Understand the importance of theories of knowledge.

Unit 3: Ethics and Professionalism

Specific Objectives

Student should be able to:

1. Understand theories of ethics.
2. Apply theories to some of the important issues in education.
3. Understand the value of teaching philosophy to children.
4. Assimilate how the law impacts the professional life of the teacher.
5. Think critically about what constitutes professionalism and being a professional teacher.

Unit 4: The Student-Teacher as Philosopher

Specific Objectives

Students should be able to:

1. Formulate their own personal educational philosophy.
2. Assess the merits of devising a Jamaican educational philosophy.
3. Critically think about how technology has impacted education in the past and present.
4. Speculate about the impact of technology on the development, research and educational philosophy.
